  Hey all...just got DOOM II...really cool game!  They made a lot of new
monsters...and a really cool new weapon:  the super shot gun.

  Its sweet...and ya, it does look different than a normal one when laying on
the ground...its kinda a saw-ed off shotgun with 2 barrels.

  The new music is pretty cool...

  Has anyone seen any new bosses except that big guy at the very end?  I don't
understand how to beat him with out cheating...??

  And level 31 is a wolfenstein level...the guys are old nazi soldiers from
wolfenstein and stuff...pretty funny.
